- 2) Close the preserving jars with the matching lids until the first resistance. Make sure that the lid and rim of the preserving jars are dry and clean before closing. Attention: The contents of the jars must be completely cooled down before you vacuum seal them with the Lava vacuum cover.
- 3) Switch the Lava vacuum sealer to container mode and place the vacuum cover over the lid of the jar. The vacuum process starts automatically
- 4) As soon as the maximum vacuum is reached, stop the vacuum process and remove the vacuum cover from the jar
- 5) A high-quality vacuum has now been created in the jar
